
Hardy Kiwi

(Actinidia arguta)

Anna

Issai

Michigan State

Tatyana

Male (2 types)

Features:

- Food: Delicious sweet fruit larger than a grape - 5 year vines can produce 50-70lbs of fruit. Stores well, pick when soft & sweet.
- Growth Habit: Grow on trellis or fence; has multiple vines from the ground that can grow 15 feet/year. Trim easily. Great fruit. Ornamental. Producers in full sun and 1/2 day shade.
- Mulch: lots of leaves which decay very well.
- Males can pollinate Fuzzy Kiwi (*A. deliciosa*).

Characteristics:
