
Chinese Date Plum

‘Jujube’

Ziziphus jujuba

Li (early)

Lang (mid season)

Features:

- Food:
 - ★ fruit is a desirable dried date substitute, and is widely prescribed in Japan as a medicinal immune system booster.
- Wood:
 - ★ Dense, used for turning, fuel & tool handles
- Cultivation:
 - ★ Pollination as observed at Eco-Sense seems to occur from yellow jackets preying upon tiny ants that feed at the flowers.
 - ★ very drought tolerant, needs a hot dry summer to produce fruit as well as it needs cross pollination with another cultivar.

Characteristics:

Size	25' tall x 15' wide	Sun/Shade	full sun
Soil	well drained	Pollination	needs cross pollinator
Zone	7-9	Water	drought tolerant
Bloom	May	Harvest	when fruit is fully red
Decid. /Evrgreen	deciduous
