
Paw Paw

Asimina triloba

Features:

- **Food:** Fruit is large and custard-like with flavour described as a cross between mango and banana.
- **Planting Guidelines:**
Unlike most plants, do not disturb the roots. Dig hole twice the size, keep half the soil, add 1/2 vermiculite and add handful of bone meal and a broad spectrum mycorrhizal inoculant. First two years protect from the sun with remay cloth.
- Fruits in 5 years.

Characteristics:

Size	15' to 25'	Sun/Shade	either - see notes
Soil	well drained and fertile	Pollination	needs pollinator
Zone	6-9	Water	moist
Bloom	March	Harvest	when fruit begins to drop
Decid. /Evrgreen	Deciduous
